AB - J07215828 New detergent compsn. contains a mixt. comprising (A) silica particles or a solvent-insoluble silicone resin(s), (B) a water-soluble silicone deriv(s). and (C) dimethyl polysiloxane and dispersed in an aq. soln. of a surfactant(s). Pref. (A) has an average grain size of 0.01-500 μ . Pref. (A) : (B) : (C) blend wt. ratio of (1:1:1000) to (90:90:100). Pref. the concn. of the mixt. comprising (A), (B) and (C) is 0.1-10.0 wt. %.

- Pref. (B) is one or a mixt. of derivs. of formula (1), (2) and (3). R1 = gp. of formula $-(R2)c-O-(CdH2dO)e-H$ (4) or $-(R2)c-O-(CH2CH(OH)CH2O)f-H$ (5).; R2 = divalent hydrocarbon; c = 0 or 1; d = 1-5; e = number corresponding to a content of $(CdH2dO)e$ in (1), (2) or (3) of at least 40 wt. %; f = 0-10; a and b = numbers giving an average molecular wt. of 2,000-100,000. Pref. (C) is of formula (4). n = 0-20,000.

- USE - The compsn. is useful for cleaning the hair and body.

- ADVANTAGE - The compsn. has high time-lapse stability, foams high and stably and imparts good finger-combing properties, without stickiness, and wet and smooth touch and conditions on the hair well.
